

SIMPLEX TrueSite Workstation

Next generation platform manages an entire fire and life safety network from a single location

Enhanced protection in networked environments

In today's complex multi-building, high-rise and campus environments, life safety is a top-of-mind concern. The protection of people, property and assets can hinge on the ability to quickly respond to an emergency and effectively manage system information from a central command center.

With these challenges in mind, SIMPLEX created the TrueSite Workstation – an advanced, next generation life safety information management system developed specifically for large, network installations. The leading edge TrueSite platform enables multiple panels and buildings to be monitored and controlled from a single location. UL/ULC listed and FM approved as a supervising station receiving unit, the TrueSite system can provide an outstanding life safety information management solution in commercial facilities, hospitals, universities, hotels, airports and other demanding environments.

Fast emergency response and notification

The TrueSite workstation has been designed to support fast, efficient response to emergency situations. In an emergency, TrueSite receives incoming data from system devices and then automatically provides operators with color coded action messages; customizable WAV file based audio notifications; and detailed, step-by-step instructions on how to respond to the specific condition.

TrueSite workstation supports the simultaneous display of graphical and textual alarm data on up to four display screens, giving system operators added ability to quickly assess system activity and respond rapidly to an emergency. TrueSite also includes highly configurable email event notification capabilities, extending the power of the system to mobile and offsite team members

A powerful platform for centralized management

When it comes to managing the wide array of information that drives a large fire alarm network, the TrueSite system stands out for its power, flexibility and ease of use. A PC based graphical command center that runs on Microsoft Windows, the TrueSite workstation can seamlessly accept and process information from literally thousands of detectors, notification appliances and other network devices. The system's power is evident in its ability to:

- Monitor and control up to 100,000 points
- Support seven network loops and as many as 686 network nodes
- Monitor any brand of control panel using agency listed digital alarm communicators
- Store historical data for up to 10 million events
- Graphically display information and events on a campus-wide site map and individual building floor plans.
- Provide mobile connectivity and notification using Apple and Android Mobile Clients

What can TrueSite do for you?

- Strengthen protection of life and property through centralized life safety information management
- Help accelerate emergency response and control training costs with intuitive graphical interface and event specific operator instructions
- Improve operational efficiency through quick access to information and customizable menus
- Protect your investment and prepare for the future with forward-backward compatibility

High resolution color graphics

With an advanced graphical user interface, the TrueSite Workstation provides touchscreen or mouse-driven access to all system control features. It can import building site plans and graphically display fire, emergency, supervisory and trouble conditions occurring on the network. Higher screen resolutions provide additional space for detailed graphics. Plus, pan and zoom technology makes it easy to zero in on a specific point of interest.

Seamless integration, outstanding survivability

The TrueSite system combines seamless integration with industry leading survivability. Using its Digital Alarm Communication Receiver (DACR) interface, TrueSite can accept alarm information from virtually any control panel. This enables TrueSite to integrate control panels from other vendors as well as panels in locations too remote to be networked.

The TrueSite system is further distinguished by its exceptional survivability. The TrueSite workstation operates as an actual node on the fire alarm network, providing true peer-to-peer linkage with all panels on the network. This fortifies the TrueSite system's ability to continue operations even if a catastrophic event cripples other parts of the network.

TrueSite Incident Commander: TrueSite Workstation Power built into your Fire Alarm Panel

TrueSite Incident Commander takes all of the leading-edge features of a TrueSite Workstation and delivers them in a space-saving package that mounts in a SIMPLEX 4100ES fire alarm control panel cabinet.

Featuring a large, 19" (48.3 cm) high resolution, color touch screen interface, Incident Commander runs off the UL864 listed power supply and secondary batteries in the panel, ensuring that the system continues to operate even if the electricity fails. This integrated design saves work space and eliminates the need for costly fire alarm listed UPS back-up power supplies required by desktop systems.

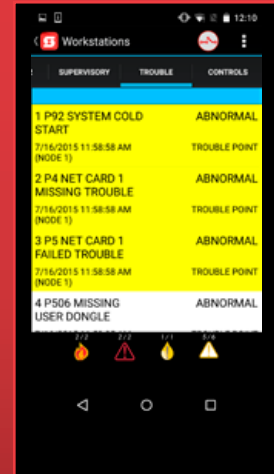

TrueSite Workstation Mobile Client

The new TrueSite Mobile Client brings the features and functionality of the TrueSite Workstation to your Apple or Android™ mobile device or tablet. Available for download from iTunes and Google Play™, the TrueSite Mobile Client lets you access and monitor your facility's TrueSite Workstation remotely, giving you the flexibility to view system information and diagnostics wherever you are.

- Connect an unlimited number of Mobile Clients to your TrueSite Workstation
- Display of Fire Alarm, Trouble, Supervisory Service, or Priority 2 Alarm conditions via active lists or graphical icons
- Access to system control operations (Where acceptable to the local AHJ or civil authority)
- Mobile access to critical fire alarm system information

Ready for today ...and tomorrow

SIMPLEX provides a comprehensive array of fire alarm solutions to customers around the world. With over 100 years of history we are a leader in life safety.

- Total solutions – SIMPLEX can deliver a complete, cost effective solution that meets your needs today and is flexible enough to scale as your facility and requirements evolve.
- No project too large or small – From retrofits and upgrades to new construction, SIMPLEX can handle virtually any project.
- Proven experience and reliability – A commitment to quality and a history of successful installations have made SIMPLEX one of the most trusted names in the industry.
